

Press release

New centrifugal fan catalogue by Pollrich DLK Fan Factories

For the product segment compact industrial centrifugal fans Pollrich DLK Fan Factories introduces the new single inlet centrifugal fan series CREM (direct drive) and CRER (belt drive).

The new centrifugal fan catalogue covers a defined standard range with pressures up to 10000 Pa and flow rates up to 85000 m³/h. The catalogue allows the fan selection both for fixed number of poles and for operation with frequency converter. Optionally both series are available as Ex-proof design according to directive 94/9/EC.

The new catalogue concept allows a preselection of the required fan depending on best efficiency or best price. All technical data of the selected fan for the particular operating point is shown on a single catalogue page. A wide range of accessories enables the configuration of the requested fan.

Specifications and a fan-ABC complete the new catalogue.

The new catalogue is available for download under www.pollrichdlk.com.

With the trademark Pollrich DLK Fan Factories, the companies Pollrich Ventilatoren GmbH and DLK Ventilatoren GmbH offer the widest product range on the fan market:

Heavy-duty industrial centrifugal fans, compact industrial centrifugal fans, axial fans, plug fans and smoke extraction fans.

Pollrich DLK Fan Factories combines more than 140 years experience of both companies in industrial fan manufacturing.
